Quick Receive function

Looking for a simple way to receive inventory and track vendor purchase history for any of your inventory items? Quick Receive may be your answer. The quick receive feature was introduced last year at the request of users who were just looking for a simple way to track received orders and on hand amounts, but did not want to use Advantage to do the actual inventory ordering. The quick receive menu is accessed from the Addins/Purchasing menu.

Note: All purchasing functions require the purchasing module, which may not have been included with your original Advantage software purchase. If you already use purchase orders with Advantage, you will not use the Quick Receive feature. If you do not have the purchasing/inventory module and would like additional information, please contact our office.

Item Code	62053	Description	Amoxicillin 500mg
Date Rec'd	10/20/06	Vendor	Aminophylline 100mg
Pkg. Cost	375	Exp. Date	Amoxicillin 100mg

On Hand	590		Amoxicillin 500mg
Pkgs. Received	2		Amoxiject Injection
Total Qty. Received	1000		Ampicillin 250mg
			Amputate Limb

Quick Receive Menu

You can lookup the item you are receiving by either code or description. When receiving an item, you can also enter the vendor, qty received, cost, etc, and all this data will be automatically posted to the edit inventory window. Reception history is tracked for each inventory item on the edit inventory window, there is also a vendor purchase history report allowing you to print inventory reception by date range and by vendor.

The Quick Receive menu allows you to enter multiple items quickly by clicking the Add New icon after each item is received. Once done will all items, click OK to exit the Quick Receive menu.

Handling NSF Checks

There are a few different options for handling a bounced check in Advantage. Here is a common method. This assumes you have a \$20 charge to the client for a returned check. For this method, two items should be setup in your system. First, you should have a payment type of "NSF Check" or equivalent. Payment types are defined from the Lists/Invoice/Payment Types menu. You should also have an item in your inventory/procedure list called "Returned Check Fee" or equivalent with your price for a returned check.

Thought for the month It's a small world, but I wouldn't want to paint it.

Holiday Schedule

Please make a note that Vetech will be closed the following days:

Thanksgiving
11/23/05 - closed
11/24/05 - half day

Christmas
12/22/05 - half day
12/25/05 - closed

New Years
12/29/05 - half day
01/01/06 - closed

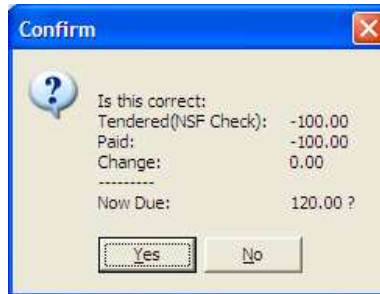

We're on the Web!

See us at:
www.vet-software.com

Here is our example:

September 15 – Process \$100 invoice and \$100 payment
September 25 – receive the NSF check for \$100 back from your bank

1. Create an invoice for this client on September 25 for the Returned Check Fee of \$20. It is a good idea to provide as much documentation for this invoice as possible in the invoice notes box such as "bounced check # 1234 for \$100 – check written on 9/15/06, etc" This will clear up any questions the client may have over this new charge.
2. Close the invoice and apply a payment for -\$100 (negative \$100) on September 15. This process will correctly negate the original payment from September 15 and also not cause the current day payment totals to be incorrect.) Here is what the payment confirmation will look like.

This process will leave the client with a balance of \$120 (\$20 invoice and \$100 negative payment). This process will only add the \$20 to your production totals and not affect the original production on September 15th.

Upcoming Trade Shows

We would love to have you visit the Vetech booth in the exhibit hall if you will be attending one of the following upcoming veterinary conferences. Our staff will be demonstrating the latest version of Advantage and Advantage for Equine on desktop and tablet computers and offering great show specials. Hope to see you there.

American Association of Equine Practitioners	December 3-5, 2006	San Antonio, TX
North American Veterinary Conference	January 14-17, 2007	Orlando, FL
Western Veterinary Conference	February 19-21, 2007	Las Vegas, NV

Follow the Cat

A man absolutely hated his wife's cat and decided to get rid of him one day by driving him 20 blocks from his home and leaving him at the park.

As he was getting home, the cat was walking up the driveway.

The next day he decided to drive the cat 40 blocks away. He put the beast out and headed home.

Driving back up his driveway, there was the cat!

He kept taking the cat further and further and the cat would always beat him home. At last he decided to drive a few miles away, turn right, then left, past the bridge, then right again and another right until he reached what he thought was a safe distance from his home and left the cat there.

Hours later the man calls home to his wife: "Jen, is the cat there?"

"Yes," the wife answers, "why do you ask?"

Frustrated, the man answered, "Put that son of a ***** on the phone. I'm lost and need directions!"
