## VETECH Releases Advantage for Windows® 25.300

VETECH is proud to announce version 25.300. Version 25.300 includes many, many new features that have been requested by users just like you. Emails were sent out recently to all users with email addresses on file. If you do not supplied VETECH with your email address for announcements and upgrades please contact our office with this info. You can also send an email to [info@vet-software.com](mailto:info@vet-software.com) to supply your email information.

For this upgrade CD-ROMs will only be sent by request. If you would like to receive this new update on CD-ROM, please contact our office and a CD will be mailed to you immediately. In order to comply with California tax laws, there is a net \$5.00 charge for CD distribution for all users that subscribe to our software maintenance plan, plus any tax and shipping. For users that don't subscribe to our software maintenance plan, the upgrade price is \$295.

Here are some brief highlights for the new version. Detailed information on all new features will be mailed to you if you request a CD-ROM. These release notes can also be emailed to you.

- *A new field has been added to the Client+ menu to store a default credit card for clients. All stored credit card information is encrypted. This default credit card is also integrated with X-charge for fast payment processing.*
- *View longer client notes with one click to expand notes section.*
- *Global Vet link for online certificates and coggins forms now exports patient pictures.*

**Quote of the Month:** A government that robs Peter to pay Paul can always depend on the support of Paul.

**George Bernard Shaw (1856 - 1950)**

- *Bar code data entry for both invoicing and Inventory reception has been added. Advantage currently supports the Honeywell 3800 USB bar code scanner.*
- *A new Medical Record white board has been introduced with a single menu to view hospital activity.*
- *New sorting filters have been added to the open medical record window to allow for quick lookups and medical record access. You can now quickly search by patient name, client name, or client number.*
- *A new feature has been added to the edit invoice window to allow you to change all the line items on an invoice to a specific date, or provider, or patient. This will save a lot of time when updating estimates put in on previous date or just correcting data entry mistakes.*
- *A new staff message prompt has been added to the invoice close process. This can be used for staff training purposes or just general reminder messages to prompt staff with information when closing an invoice.*
- *All provider reports allow you to select any number of providers. Previously you could only select one provider or all providers*
- *The item range filter which is a popular function to globally raise prices or dispensing fees can now be run on a per category basis rather than a per item basis. So it is very fast to do a price increase for all "surgeries" or "vaccinations", even if their item codes are not in sequence.*

Contact our office for a complete listing of all new features in 25.300. These should be shared by all staff at your practice. The new feature list can be mailed with your CD-Rom or Emailed.

## HOW SMART IS YOUR RIGHT FOOT?

You have to try this please, it takes 2 seconds. I could not believe this!!! It is from an orthopedic surgeon..... This will boggle your mind and you will keep you trying over and over again to see if you can outsmart your foot, but, you can't. It's pre-programmed in your brain!

**1. Without anyone watching you (they will think you are GOOFY.....) and while sitting at your desk in front of your computer, lift your right foot off the floor and make clockwise circles.**

**2. Now, while doing this, draw the number '6' in the air with your right hand. Your foot will change direction.**
