

VETECH ADVANTAGE SOFTWARE RELEASES VERSION 25.332

Oshkosh, WI (July 13, 2010) – ImproMed, Inc. is pleased to announce the immediate availability of the Vetech Advantage practice management software version, 25.332, for its customers.

This update welcomes new, and advanced, vendor partner integrations including ANTECH Diagnostics, PetDetect, RmCards.com and X-Charge. Lab requests created in Vetech Advantage are now electronically submitted to ANTECH, with the completed test results being sent back to the patient's medical record; saving clinics both time and paperwork. PetDetect labels & printers are now compatible with Vetech Advantage, offering customers the ability to create colorful labels with the pet's name, medical information and more. These labels can function as identification collars for the individual pet or its belongings. The new release also supports the online reminder card service, RmCards.com, which allows users to design and send personalized, photo-quality marketing & reminder postcards to their customers. Updates made to version 25.332 make the Vetech Advantage X-Charge integration 100% compliant with the new Federal Credit Card Regulations that will be July 2010.

Additional program enhancements include Text Messaging, Appointment Scheduler changes, additional staff security options, new informational bundles, Boarding Reservation Quick Blocks and so much more.

“We're excited about providing our customers new partnership integrations within the Vetech Advantage software,” said William Randolph, ImproMed's Vice President of Technical Services. “Vetech Advantage's 25.332 innovative program enhancements, combined with the vendor relationships, provide an improved user experience and a more advanced software platform for Vetech Advantage users.”

Vetech Advantage customers can download version 25.332 at www.impromed.com/ican.

ImproMed was rated #1 in Client Satisfaction in the 2008 *Trends* survey, and is a world-leading developer and provider of business and medical management software for the veterinary industry. ImproMed continues to provide veterinarians with the best software and knowledge management solutions by carefully monitoring changes in the veterinary medicine field and implementing program suggestions from their clients. It has also experienced business growth through the 2009 acquisition of Sunpoint Software, Inc. and the 2010 acquisition of Vetech Software Services, Inc.
